COOKIES

What is a Cookie?

Cookies are text files containing small amounts of information which are downloaded to your device when you visit a website. Cookies are then sent back to the originating website on each subsequent visit, or to another website that recognises that cookie. Cookies are useful because they allow a website to recognise a user's device. You can find more information about cookies at: www.allaboutcookies.org

Cookies do lots of different jobs, like letting you navigate between pages efficiently, remembering your preferences, and generally improve the user experience. They can also help to ensure that adverts you see online are more relevant to you and your interests.

Use of cookies by NP GLOBAL LLC

Within this website cookies are used to facilitate features and functions which improve your browsing experience. They are also used to measure the performance of the site and the ways in which visitors navigate their way around. No personally identifiable information is collected by the cookies on our site.

The below information details the cookies we use, how to prevent these being written and the impact of doing so on your browsing experience.

Disabling/Enabling all cookies

You can accept or decline cookies by modifying the settings in your browser. However, you will not be able to use all the interactive features of the site if cookies are disabled.

Most recent web browsers allow control over the cookies saved through the browser settings. To find out more about cookies, including how to see what cookies have been set and how to manage and delete them, visit www.allaboutcookies.org.

Disabling/Enabling specific cookies

We are working to provide the ability for you to manage your cookie preferences within our website, but this functionality is currently under development. As an interim step we have detailed below all the cookies set by our websites, their purpose and details of how to opt out where available.

More information about cookies

There are four main types of cookies used by websites. These categories are described below, based on the information published in the International Chamber of Commerce Cookie Guide; Strictly Necessary Cookies - Enable services you have specifically asked for

These cookies are essential in order to enable you to move around the website and use its features, such as accessing secure areas of the website. Without these cookies services you have asked for, like shopping baskets or e-billing, cannot be provided.

Performance Cookies - Collect anonymous information on the pages visited

Nova Poshta Global

These cookies collect information about how visitors use a website, for instance, which pages visitors go to most often, and if they get error messages from web pages. These cookies don't collect information that identifies a visitor. All information these cookies collect is aggregated and therefore anonymous. It is only used to improve how a website works.

Functionality Cookies - Remember choices you make to improve your experience

These cookies allow the website to remember choices you make (such as your user name, language or the region you are in) and provide enhanced, more personal features. For instance, a website may be able to provide you with local weather reports or traffic news by storing in a cookie the region in which you are currently located. These cookies can also be used to remember changes you have made to text size, fonts and other parts of web pages that you can customize. They may also be used to provide services you have asked for, such as watching a video or commenting on a blog. The information these cookies collect may be anonymised, and they cannot track your browsing activity on other websites.

Targeting/Advertising Cookies - Collect information about your browsing habits in order to make advertising relevant to you and your interests.

These cookies are used to deliver adverts more relevant to you and your interests. They are also used to limit the number of times you see an advertisement as well as help measure the effectiveness of the advertising campaign. They are usually placed by advertising networks with the website operator's permission. They remember that you have visited a website, and this information is shared with other organizations such as advertisers. Quite often targeting or advertising cookies will be linked to site functionality provided by the other organization.
